

Jan Vrba received the M.Sc. and Ph.D. degrees from the Faculty of Electrical Engineering of the Czech Technical University in Prague (1972 resp. 1976) and since 1993 he is a Full Professor of Radioelectronics at the Dept. of Electromagnetic Field. In the period 1972 till 1981 his research was oriented on parametric amplifiers and microstrip resonators. Since 1981 his research activities are focused on medical and industrial applications of microwave technology. He was a member of the team which developed the first system for microwave hyperthermia in cancer treatment in the former Czechoslovakia. Scientific interests of Prof. Vrba are oriented mainly on development of technologically new hyperthermia applicators. He is a member of IEEE, ESHO (European Society for Hyperthermic Oncology) and the Electromagnetic Academy. For his contribution to technological development he was awarded by "ESHO-Pyrexar Award" in 2015.
